Erode - 638452 | pkkavi2468@gmail.com | +91 6369657797 | linkedin.com/in/kavipriya-pk | github.com/Bloom-Yami

PROFESSIONAL SUMMARY

Motivated 3rd-year B.Tech student in Artificial Intelligence and Data Science (AI & DS) at Excel Engineering College, aspiring to become a Full-Stack Developer. Skilled in programming, problem-solving, and backend development, with hands-on experience in AI-driven projects such as drone logistics backend development. Actively learning web development technologies to build scalable, user-friendly applications and eager to contribute to innovative software solutions.

SKILLS

Technical Skills:

Python, Java, SQL, Pandas, NumPy, React JS, Flask, HTML, CSS, JavaScript, Git, GitHub

Tools:

VS Code, Cursor, Antigravity, MATLAB, Canva

EDUCATION

Excel Engineering College — B.Tech in Artificial Intelligence & Data Science

- CGPA: 7.7 / 10 (through 5th semester)

Saratha Matric Hr Sec School — HSC (Higher Secondary)

- Percentage: 75 / 100

Bharathi Vidhyalaya Matric Hr Sec School — SSLC

- Result: Pass

EXPERIENCE

Junior React JS Intern *Thiran360AI (On-site)*

- Developed web applications using React JS.
- Built a complete static website from design to deployment.
- Applied modern frontend development practices and component-based architecture.

Artificial Intelligence & Data Science Intern *YBI Foundation (Remote)*

- Analyzed road accident data to identify key contributing factors and trends.
- Created data visualization dashboards to communicate insights clearly.
- Gained hands-on experience in AI, Data Science, and Python-based analysis.

PROJECTS

AI-Based DNS Zero Trust Security Platform

- Designed an AI-powered DNS security system built on Next.js and applying Zero Trust principles.
- Built a two-layer scanning system integrating the Google Safe Browsing API to flag suspicious domains.
- Implemented a React-based settings module (security policies, notifications, data retention, API keys) with validation and persistent storage.
- Analyzed DNS traffic patterns to identify suspicious activity and strengthen network security.

Spice Route Recipes

- Developed a full-stack recipe sharing web application with user authentication, personalized recipe management, and CRUD functionality.
- Built recipe browsing with search, category, and regional filters, organized by preparation time, servings, and cuisine.
- Integrated Supabase for secure authentication, real-time database operations, and user profile management.
- Designed an intuitive, mobile-friendly interface using React, TypeScript, Tailwind CSS, and shadcn/ui components.

Customer Churn Prediction

- Developed a machine learning model to predict customer churn from behavioral data.
- Performed data preprocessing, feature selection, and model evaluation to improve prediction accuracy.

CERTIFICATIONS

- Great Learning — Ethical Hacking, Mobile Platform, Network Architecture
- HackerRank — SQL (Intermediate), Problem Solving (Intermediate), React (Basic), JavaScript (Basic & Intermediate), CSS, Node.js (Basic), C# (Basic), Java, Python
- MATLAB — Explore Data with MATLAB Plots; MATLAB Desktop Tools and Troubleshooting Scripts; How MATLAB Graphics Work; Deep Learning Onramp
- AWS Training & Certification — AWS Cloud Practitioner Essentials
- IBM SkillsBuild — Web Development Fundamentals
- Cisco Networking Academy — Introduction to Cybersecurity; Python Essentials 1
- Simplilearn — Introduction to SQL; GitHub Basics

LANGUAGES

Tamil — Native Proficiency | English — Professional Proficiency | Hindi — Conversational Proficiency
